JOHN MeMANMAN. IMPORTANT TO THE PUBLIC! THE following advertisement was published in May, 1949, in the "Boston Daily Times," and various other newspapers in the United States, by James G. Wilson, East, the owner of the "Woodworth Rhemt," shortly after 1 and advertised my "PATENT STATIONARY CETTER, PLANING, TONGULING, AND GROOVING MACHINE," (throughout the United States;

throughout the United States:

"PLANING PRACHINES.

"Itake this method of answering the frequent inquiries, by letter and otherwise, as to my opinion upon the various notices through the papers, of the Stationary Kinke Planing Machines attempted to be palmed off upon soveral personal ignorant of their true worth. I would state for the information of the enquirers that they will find substantially the machine now offered by several prevending intentors, doscribed in the 16th volume of the Repetvory of Arts, invented by Samuel Benthan, in the year 1791. A like machine was patented in this country by one Kugler, some six teen years since, and nother one put up by Albert Richards, of West Troy, N. Y., and abandoned about the same time. It ought to astisty the public to know that after fifty eight years experimenting upon those machines, not one in use 10 day value for the purposes contemplated. I will furnish a Stationary Knife Michine equal to any now in use, or to any offered by the pretending inventors, at the cost of the machine and five per cent for my trouble.

JAMES G. WILLSE M.

May 19, 1819.

I deny that any person ever saw or heard of such a machine is milited in the month of August, 1813, and no muchine before this could do so much work, and do it as well as milited in reply to the above attendment, and in order that the public may be assured that thream which tay, I will offer to picky of Xm 2400 May 10, 100 May 11, 100 May 11 "PLANING DIACHINES.

JOHN DWIGHT & CO'S SODA SALÆRATUS

MAY be found at the Sugar Warehouse of Goodrich & Hunter, No. 42 East water-et.

The attention of the public is called to this article as being superior to Pearskah Salaeratus in its effect—giving cookery a more delicate appearance and flavor; and also as more whole-norm—Sods being more congenial to the human system than Pearlach Salaeratus—a less quantity being required to produce the same offset. The article is put up in pound papers with full directions for use.

Also may be found, John Dwight & Co.'s Washing & Cleansing Powders,

which will be found, on trial, a very superior article, saving much labor of washing Ciothes, &c. It will soften here water. To Engineers and Machinists it is invalinable for removing grease from Machinery and other from works leaving the from perfectly dry, and not label to rust.

Directions for use are printed on each package.

BT ATRIAL. SHELDON'S WATERPROOF LEATHER POLISH

Do you know that of all the articles manufactured .

SHELDON'S OIL WATER PROOF POLISH Is attracting the most universal admiration where it has been tested! We can produce testimony of the highest regutation, and are confident of yours, if you will but give it a flit trial. It surpasses everything ever before offered to
the World.
It gives a brilliant polish, and is not washed off by Castile
soan and water. It is easily applied, and will last as long as
your Leather. Ladies commend it very highly for their
awn, and misses shoes and Rubbers. Adding to a brilliant lustre the virtue of not solling the wittest linen. For Gentlemen's BOOTS, HARNESS, CARRIAGE TOPS, TRUNKS, PATENT LEATHER AFTER WORN, and Leather of every description. It is susceptible of 0it to Leather, and not only keeps out water, but preserves the Leather, and keeps it from cracking.

Dealers' attention is respectfully invited to an examination. Manufactured on Mississippl street, opposite the Eagle Furnace. Orders addressed to O. P. Shillion & Co., Blut-falo, N. Y., will need with prompt attention.

The City Tax List was published in that paper without orders from the City Treasurer.

This, like the foregoing, is a lie out of whole I wrote, or, at all events, intended to speak of Mr. Donaldson, who occupies the position indicated. Mr. Donaldson, who occupies the position indi-cated. As to Mr. Conger, it is doubtless true that he did, in the former part of the session, take the floor too often. It is by no means an uncommon fault, arising from the excessive desive of members to make themselves understood, if

possible, on every question.

A memorial was read this morning to the Assembly, from Rev. J. Gridley of Kenosha, in reference to the abolition of capital punishment. I is a briefly condensed argument in favor of the law as it is, and was listened to with much inter-

Mr. Ricker presented two bills, for cedling the jurisdiction of certain lands at Two Rivers and Bailey's Harbor, for lighthouse purposes. They are introduced at the suggestion of the Suprintendent of Light Houses, who wrote to Gov. Far-

well on the subject.

A bill is before the Legislature, or rather there are three bills before the two House, providing for the election of State Prison Commissioners by the people. One of them was reported back this morning by Mr. Mott, from a select committee It provides for the appointment of three by the Governor, to act till others, chosen by the people, take their places; and also provides generally for the management of the State Prison. Something

very like this bill will pass, I think. L. N. Dewey for First Assistant, D. Neiman for Mr. Reynold's claim for damages, having already passed the Schate, was this morning referred to a select committee, consisting of Mesers. Cate, Sugden, Powers, Bancroft and Richardson.
The joint Resolution passed by the Senate a

few days since, proposing to go into joint ballot for Commissioners of Public Works, and Register and Receiver, on Monday morning next, was taken up and passed. There was no debate, but Dr. Hoyt took (ecasion to say that he, with other members, had been "dogged about" by candidates for the office- long enough, and be thought the Legi-lature ought to go into the election as soon as possible, and "let em slide." There are ous candidates here, and some of them are making a strong interest. I doubt very much whether Mr. Croswell will obtain a re-election. For Commissioners, Gen. Win. Blake has many friends among the Whigs, and Col. Maxwell is favored by many. Hon. Mr. Richardson, member from Grant, is also spoken of by some of the members for the office. Could be be induced to accept, and be elected, there would be, at all events, one honest, upright and efficient officer upon the Board. Among, the "democracy" Mr. roudfit of Wankesha Co., is prominent. The sco-soilers, so far as I learn, have no candidate, but will act as their judgment dictates. A strenuous effort is to be made to 10-olect Mr. Henning Register, but Mr. Bashford, an energetic, capable, and every way qualified candidate, is rapidly gaining friends. Well! the long agony will soon be over, and the innumerable caravan of candi

iate- move to the pale realms of shade. Mr. Cain's bill, giving an additional lien to mechanics for repairs, was up in Committee of the Whole this morning. He stremously urged its adoption, but the feeling of the House, so far as it would be indeed to the feeling of the House, which is the feelin could be judged of by the votes upon amendments seems to be somewhat averse to the extension of

The above provision, after a most interesting debate, in which Messis, Hoyt and Giles spoke in tavor, and Mesers, Worthington, Conger, Donaldson, Lawrence and Mott were against, was voted down by Ayes 25, nos 36. Of the ayes 3 were whigh - Messis, Giles, Catton and Burnhau -and of the noce 21 were whige. It is doubtless ne that one principal reason for the political place of the vote was that it had leaked out that the reputed father of the project had been uiging mocratic friends to vote for it, because, as as he represented, the whigs would be held respossible if the measure should be a bad one, and they (the democrats) could clain the credit, if it should prove to be a good one. But there is a well-grounded dislike to enter upon any experiments of the kind.

## THE CIRCUIT COURT.

The case of the State against WILLIAM B. RAT-CLIFF and TROMAS TROMPSON, indicted for burglary and larceny, was resumed in the Circuit Court yesterday morning; Mr. J. E. Annord making the best argument on behalf of the prisoners that the case admitted, and Mr. District Attorney BUTLER, summing up for the People in an enricst, impassioned and telling speech.It was Mr. Butlera's ablest effert and won high ncomiums from all who heard it. The case was then given to the Jury under a very strong and impressive charge from the Judge.

After an absence of about an hour the Jury re-

mmed with a verdict of Guilty as to both defendants. The Judge intimated that, before sentening the prisoners, he desired to make some inquiies, whereupon Radeliffe and Thompson were manded to Jail. The Court Room was crowded

BEFORE JUDGE HUBBELL. district Attorney Butler and E. G. Ryan for the J. E. Arnold and A. D. Smith for Prisoner.

SPEECH OF J. E. ARNOLD—CONCLUDED WEDNESDAY, March 10. So with the officers, so with this spot. It is a well defined, circunseribed spot, and it has been shown to you by my colleague that when he stepped into the pools of blood which surrounded Ross he would not have received so small, so circunscribed and well defined a spot as that. After the boots had passed through the wet marsh, the wet would have diffused it. Dr. Garner swears to you it would,—If he may have worn other boots, and they cannot take back what they have sworn other boots, and they cannot take back what they have sworn other boots, and they cannot take back what they have sworn other boots, and they cannot take back what they have sworn. Suppose that carrying awaythe entrails of the chickens one of the eggs which attached to them fell on the ground and that he trod on it. I believe bofose my Maker and Judge this was the cause—it would recount for the albumen—It would remain there all day like a spot of vanish—if the white of an egg god on the boot it would necount for such a spot better than blood, which would have been diffused by water. Another circumstance is, when the boot was found by Mr. White, it had on it, a hair of a brown color, which they suppose was the lain of Ross. Is there one man on that jury believes that one hair could get on that boot and adhere to it after passing through a wet mass for 1/2 mile. I would give up in despain. Gentlemen, they boots never were there. The naud—the spot it he lair—every supposition is unnatural. The spots on the vest, the Procentian centend, irrisitably connect the defendant with the corpus delication that the boot of a man who had been naudered or the blood from the nose bleed, to which the defendant was subject, is not proved—and you are asked to say it is the blood of anywerlebral animal, whether the blood of a man who had been raundered or the present whether they were old or new—why not show some connection with the deathy—that before Sundry they were not there? They must not rely on supricion—it must be fairly and fully shown. And they must sho

wore these gaments, how did he clean filem? When did he wash them? There were no wash to about the place; no evidence of washing, Did he burn them? The stoves were searched and there were no restignain the stoves, the boots were day, the cost was dry, the pants were dry, everything, was dry-mot one particle of cridence to show that defendant's clothes had been used that night at the mander. We contend this circumstance preclades the isola that the defendant could have been guilty—that he could have committed the number in three clothes at 10 o'clock at night; there may be circumstances of strong supicion, yet if any one of them is inconsistent with his guilt, it is enough to break the hypothe-squad therefore he must be acquitted. A handle is made of the fact, that when defendant wished tose Boss, he pacte ded he wanted to give him a letter to his blother in Chemath, and that when the person of the deceased—that's a suspicious circumstance. I tild you there were suspicious circumstances in the case, but there were suspicious circumstances in the case, but there are facts that are totally init. Afterwards, Mr. Waren tells you be did tell him they were drunk. Now, gentlemen, you must weigh those things well in your mind, before you credit such oridence as this. Farman may have seen two men—drunken men—but they were not Ross and Fadeliffe, and why. Because they could not get drunk. Where would they get drunk? how could they have been drunk? They were not the men: Farman was unistaken, then there is nothing in this case which connects Radelite with the anorder after eight or lock when he left him.

discovered no letter was iomed upon the person of the decea-ced—that a suspicious circumstance. I told you there were suspicious circumstances in the case, but there are facts that are totally inconsistent with his guilt, which you cannot reconcile, and therefore you must acquit him. Is this circumstance of the letter consistent within you have not be several other hypothesis to account for its absence—he may have part it in the Post Office—he may have lost it, or he may have given it to Ross, and Ross may have left it. Again, if bent on murder, his conduct would not have been such. Is it not most unnatural he should do it at the time it was done? If he went home with him, some one must have seen him—on this street where there are so many salcons, and so many persons continually passing they must have been seen by some one. If they went to Walker's Point by way of West Waler Street, it alforded an excellent that for the mender, and to dispose of the bady, o'clock when he left him.

I have now gone through the facts and circumstances of this case. I have called your attention to the prominent points and satisfied your minds that you never can convict him on the evidence here produced, and that if one circumstance alone be irreconcilable with his gailt, no matter how strong the rest may be, the defendant cannot be convicted and when I come to test the case by the rules of law, I am unable to see how you can possibly find a verdict against the defendant. I am totally at a loss to know how he could have done clock when he left him.

It is present, I attest my entire satisfaction with the roos of my house, correct with the pressed, fre-proof ficility severed by Mr. Greesder having found them pressed fre-proof ficility severe things move storms rather than the first severe things move than the first severe the control of the same.

Druggist, 374 W. Water-st., 2nd ward.

Milwaukee, Feb. 3, 1852. Milwaukee, Feb. 3, 1852.

The above I found true in every respect, as to the roof of my house, covered with the same tile, invented by Mr. Graessie.

Brewer, Chestnut-st., 2nd ward.

Brewer, Clestnut-st., 2nd ward.

The timlersigted, having carefully examined the pressed roofing Thes, invented by Mr. Graesic, have found them perfectly enswering the purpose intended. Their practical and saspoints construction recommend this kind of Tile, not only as a fire proof and perfectly water-proof covering, but above all for its durability. The ridges and channels not only exclude the entering of enew or rain-water, but, by their firm and precise joining of one into the other, they give to the single The as well as to the whole covering an absolutely moreable position and an intimate connection. Besides this, Mr. Graesale's method of burning the Tiles, deprives them of the injurious tendency to absorb water, making them in this way durable; and joining to the above another virtue, via, that of dispensing with repairs. The undersigned therefore consider ourselves fully justified in recommending to the building community the above roofing Tile as an excellent and valuable material.

This is a truly wonderful remedy for Indigestion, Dyspopsia, Jauradice, Liver Complaint, Constigation, and Debility, Cutting after Nature's own method, by Nature's own Agent, the Gazeric Julea.

Agent, the Gazeric Julea of Ferrats, incused in water will constigate the Complaint of Rosat Beef In about two hours, out of the chamach.

Ferrats is the chief element, or Great Digestive Pelaciphe of the Gastric Julea. The Solvent of the Food, the Purifying, Preserving and Stimulating Agent of the Stomach of the Gastric Julea. The Digestive Stunach of the Gastric Julea. The Chembell provers, and furnishing a complete and perfect substitute for it. By the ald of this preparation the pains and erits of Indigestion and Dyspopala are removed, just as they would be by a heating Stomach. It is doing wonders for Dyspeptics, curling cases of Debblity, Emaciation, Nervous Decline, and Dyspeptic Consumption, supposed to be on the verge of the grave. The Scientific Evidence upon which it is based, is in the highest degree Curious and Remarkable.

\*\*SULENTIFIC EVIDENCE\*\*

Days to the injuriest degree currous and vernariance.

Baron Liebig in his celebrated work on Animal Cher

lettr, says: "An Artificial Digestre Fluid, analogous to it

Gastrie Juice, may be readily prepared from the nurco

memorane of the stomach of the Calif, in which various a

titles of food, as ment and eggs, will be softened, chenge

and digested, just in the same manner as they would be

the lumin stamach." Dr. Combe, in Maraluable writings on the "Physiology of Digestice," observes that "a diminution of the due quantity of the Gastric Nucleo is a prominent and all prevailing cause of Dyspepsia," and he states that "a allsting rehable professor of medicine in London, who was severely afflicted with this complaint, finding overwhing else to hill, had resource to the Gastric Juice, obtained from the stomachs of living animals, which proved completely successful.

ly afflicted with this complaint, finding verything cles to hit, had resource to the Gastrie Juice, obtained from the stomachs of living animals, which proved completely successful.

The standard of the famous works on "Vegetable Dier" says: "It is a romarkable fact in physiology, had been a project of dissolving various articles of food, and of effecting a land of artificial digestion of them in no wise different from the matural digestive process."

Professor Dunglison of the Jefferson College, Philsielphia, in his great work on Human Physiology, devotes more than fifty pages to an examination of this subject—His experiments with Dr. Heaumont, on the Gastrie Juice, obtained from the living human stomach and from animals, are well known. In all cases, he says, "digestion occurred as perfectly in the artificial as in the natural digestions."

Dr. John W. Draper, Professor of Chemistry, in the Medical College of the University of New York, in his Text Book of Chemistry, page 386, says, "it has been a question whether artificial digestion could be performed—but it is now universally admitted that it may be."

Dr. Carpenter's standard work on Physiology, which is to the library ofevery Physiologa, and it used as a Text-Book in all the Colleges, is full of evidence similar to the agove, respecting the remarkable Digestive power of Pepsia, and the fact that it may be readily separated from the stomach of the call or or a, and used for experiments in Artificial Digestion, or as a remedy for disease of the Stomach, and decients exerction of Gastrie Juice.

All modern works on Chemistry, Materia Medica, and Physiology, and all good Medical Digestive Rouder, and Physiology, and all good Medical Digestive Rouder, effectly resembling the natural fluid, may be readily pregreed, does not admit of question. The only wonder is, that it has not before been applied to the course of indigeration and Dyspepala—so naturally does such a use suggest taciff to the mind.

Many can testify to the inconvenience, and annovance, and actual pain they are subjected to, in breaking in Hats that will not fit them. By this ingenious contrivance, this very great annovance is done away; as the Hats are made to fit perfectly the first time.

Another great advantage is, by keeping a copy of the impression, we can at all times fit our customers from all parts of the country.
